

**Claims: I Claim:**

1. A digital civic community comprising:
  - (a) local government defining borders;
  - (b) a computer and communication center containing a government directory, a business directory, and a resident directory; and
  - (c) means connecting said directories.
2. A digital civic community comprising:
  - (a) local government defining borders;
  - (b) a computer and communication center containing a government directory, a business directory, a resident directory, and a television directory; and
  - (c) means connecting said directories.
3. A digital civic community as defined by claim 2 in which said means connecting said directories includes connecting telephone and television communications and all computer virtual private networks.
4. A digital civic community as defined by claim 2 in which said computer and communication center provides each directory location with audiovisual communication and computer functions as full time service in a virtual public network.
5. A method of making a digital civic community comprising the steps of:
  - (a) placing a web site in the Internet containing and connecting a government directory, a business directory, a resident directory, and a television directory;
  - (b) build a computer and communication center in a civic community containing and connecting said directories; and
  - (c) upload the entire civic community into said directories.
